DID YOU KNOW?

You are responsible for managing manure to protect surface water and groundwater. Federal and state laws forbid discharging animal wastes into water. If you are selling your property, manure management facilities can be an asset and increase your property values under today's regulatory requirements.

Agriculture Conservation Education (ACE)

A program of Marion SWCD

STEPS FOR GOOD MANURE MANAGEMENT

YOU LEARN

By participating in ACE, students learn techniques for managing manure and mud. Students receive education at a 4-H or FFA meeting or watch a recorded presentation online.

YOU EARN

There is no cost to participate in ACE. Students who enroll receive a tarp for covering manure piles. Upon successful completion of the program, students receive a certificate that can be listed on their resume, record books, and award applications. Sign up at bit.ly/MSWCD-ACE-form.
